

# Simulation based control for Energy Efficiency operation and maintenance

Newsletter #1

Welcome to the first edition of the Energy IN TIME Newsletter and thank you for taking the time to familiarise yourself with our project! These newsletters will be brought out every six months to keep you up to date on the latest developments of the Energy IN TIME Project, including interviews, upcoming events, project progress and achievements, information on the project partners and other related news. We've taken the liberty of sending you this first issue of our new newsletter due to your association with the project and/or its partners. If at any time you wish to unsubscribe, please use the unsubscribe link at the bottom of this and every issue. We also invite you to share this newsletter with your friends and colleagues and welcome any feedback or suggests.

## Project description

Energy IN TIME will develop a **Smart Energy Simulation Based Control** method to reduce the energy consumption and cost in the operational stage of buildings, using novel techniques based on the prediction of indoor comfort conditions and user behaviour to improve the Lifetime and Efficiency of Energy Equipment and Installations.

## Upcoming events

The 2nd International Energy IN TIME Meeting will be held on the 1st and 2nd of April 2014 at Faro Airport in Portugal, which is also one of the four demo sites of the project. Located 4 km from the capital of Algarve, Faro Airport is a modern facility that serves the entire coastal area of Portugal's southern-most province.
