

# Simulation based control for Energy Efficiency operation and maintenance

Dear reader,

You receive this newsletter due to an eventual connection you might have with the project 'Energy IN TIME' or one of its partners.

Thank you once again for your time and attention, it is a real pleasure for us to know that you appreciate what we present as a summary of the work of different groups who form the Energy IN TIME project. We would like to share with you the latest news in regard with the development of different solutions related to energy saving which will enable a more efficient management and control of the building.

Best regards, the Energy IN TIME consortium members

## The Fifth Energy in Time Steering Committee

The Fifth Energy in Time Steering Committee was held on April 19th

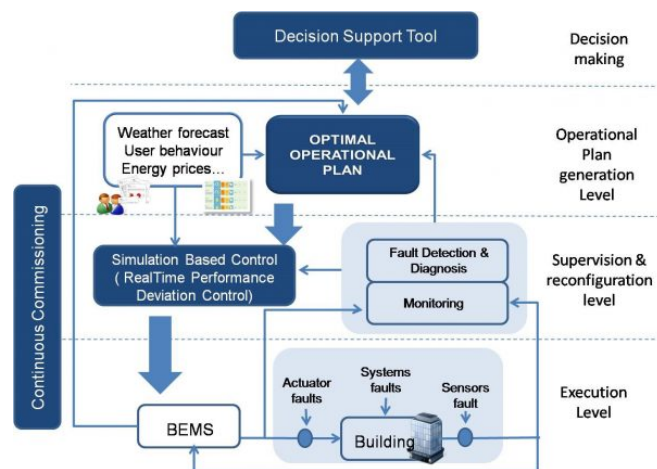

and 20th in Levi, Finland. The Levi Panorama Hotel at which the meeting was conducted was chosen on purpose, for this is one of the demo-sites at which monitoring of energy consumption of the building is enabled through one of the technological solutions developed under the EiT project and how it helps by reaching energy efficiency of the hotel.

## EiT was a speaker at EeB PPP Impact workshop. Brussels, 18-19 April, 2016

STAM, one of the EiT's members, presented the work undertaken by the project regarding energy performance monitoring and

management of energy efficient buildings at EeB PPP Impact workshop in Brussels on April, 18<sup>th</sup> and 19<sup>th</sup>.

STAM clarified the objectives of the Energy in Time project stressing a strong commitment of all the members to develop a Smart Energy Simulation Based Control method to reduce the energy consumption in the operational stage of existing non-residential buildings.

EiT participated in the European Conference ‘Sustainable Places 2016’

## organizing its own workshop with focus on Energy Efficiency at Buildings

Several organizations members of EiT, Energy in Time, took part in the workshop Sustainable Places 2016 held in Aglet, France, on June 29-July 1. This is an annual event co-organized by resilient and performer projects focused on sustainability through energy efficiency on different urban elements: cities, districts and buildings.

## EiT will take part in ACCEPT in Málaga (Spain), October 13-14, 2016

Acciona, the EiT project leader, through its Project Manager Belén Gómez will take part in the ACCEPT, an Assistant for quality Check during Construction Execution Processes for energy-efficient buildings. This workshop about will take place in a Spanish city of Málaga in October, 13-14, and will focus on Digital Technologies in Construction.
